

## Accessible tourism resources

**TUR4all** emerges to provide users with reliable and verified information by experts on the accessibility conditions of tourist establishments, offering information on physical, visual, auditory, cognitive and other types of travelers' needs.

The objective with **TUR4all** is to improve accessible tourism in Spain. Also empower tourists with accessibility needs to share information about destinations and accessible experiences and generate trustworthy others to travel.

Likewise, we want to sensitize destinations and tourist establishments about the advantages of accessibility for their development and growth, and for their businesses.
